Our Goal

We believe it's time to **eliminate the ingrained social patterning of fear and guilt around money**, and start living **our true nature and purpose** on the planet.

We want to share what we have learned, to grow the collective consciousness of people around the world, and allow them to regain their freedom of choice and hopefully return their state of mind from that of a conforming, oppressed and unthinking 'sheeple' to free men and women.

We want to see everyone who wants to be free, choose how they live on this planet according to their own beliefs and not be subservient to a fictional system of servitude that is in place just to keep the majority under the control of the 'elite' few.
